

Making a Garden: Successful gardening by nature's rules

...any keen gardener would love this excellent book. Robin Lane Fox, Financial Times Carol Klein is known for her no-nonsense approach and inspires us to garden. Gardens Illustrated In this invaluable book acclaimed plantswoman and bestselling author Carol Klein explains how to get the most from your garden by taking inspiration from what works in the wild - be it in a meadow, woodland, hedgerow, seaside or exposed setting. Carol encourages you to identify the conditions in your outdoor space - for example, the shady corner of an urban garden mimics the conditions of woodland or a windswept roof terrace will replicate an exposed hillside - and to pick the plants that flourish in these conditions. In each of the six chapters there are case study gardens that Carol admires for the way their owners have worked with the natural habitat to glorious effect and each chapter ends with a directory of about 30 of Carol's favourite plants for that habitat. As ever, Carol's text is wise, informative and beautifully written while photography by award-winning Jonathan Buckley ensures that the book is also a visual treat.
